

Abdullah Odulate

Backend Developer

abdullahodulate@gmail.com | +234 7033824496 | [GitHub](#) | [Portfolio](#)

Professional Summary

Full Stack Developer specializing in scalable backend systems using Node.js, TypeScript, PostgreSQL, MongoDB, Redis, and Next.js. Experienced building production-grade APIs, AI-integrated platforms, and performance-focused web applications.

Technical Skills

Back-end Technologies

- **Languages:** JavaScript (Node.js), Typescript
- **Frameworks & Libraries:** Express.js, Next.js API Routes
- **API Design:** REST APIs, API Design Principles, Authentication & Authorization
- **Databases:** PostgreSQL, MongoDB
- **ORMs & Tools:** Prisma

Dev-ops & Tools

- **Version Control:** Git, GitHub
- **Deployment:** Vercel, Render, Docker
- **Build Tools:** Web-pack, Vite
- **Code Quality:** ESLint, Prettier

System & Architecture

- **Back-end Architecture:** MVC Pattern, Modular Architecture
- **Authentication:** REST APIs, Fetch API, Axios
- **API Security:** Input validation, error handling, basic security practices
- **File Handling:** Upload & processing logic

Additional Skills

- **Testing:** Jest
- **API Integration:** Axios, Fetch
- **Soft Skills:** Problem-solving, system thinking, communication, adaptability

Projects

My Gym Planner – AI Fitness SaaS Platform

Technologies: Next.js, TypeScript, MongoDB Atlas, Prisma, Redis, BullMQ, Mistral AI

- Architected AI-powered workout generation platform using RAG over vectorized exercise library.
- Reduced repeated AI generation cost and latency by implementing Redis cache-aside strategy.
- Built asynchronous job pipeline with BullMQ eliminating request timeouts during heavy AI processing.
- Implemented live progress streaming with SSE for real-time user feedback.
- Designed scalable schema supporting user metrics, goals, injuries, and progress tracking.

- Integrated observability stack using Sentry + Pino structured logs.

Resivana – Real Estate Transaction Backend

Technologies: Node.js, Express, JWT

- Built secure login and registration system
- Implemented password hashing and token-based authentication
- Designed middleware for protected routes

Education

Bachelor of Engineering (Mechanical Engineering)

Lagos State University — Expected 2028

Expected Graduation: 2028

Certifications & Training

Frontend Web Development Certification

Innkeeper Training Institute | 2022

Computer Studies Certificate

Skill Acquisition Centre, Ayobo, Lagos | 2021

Achievements

- Transitioned from frontend to back-end development through self-driven learning
- Built multiple full-stack and back-end-focused applications
- Strong foundation in both client-side and server-side development
- Consistent GitHub contributions and continuous skill improvement

Professional Interests

- Back-end Architecture & System Design
- Scalable API Development
- Fintech Systems & Infrastructure
- Performance Optimization
